

Allergy Awareness Program

Creating awareness around two of the fastest growing medical emergencies - asthma and anaphylaxis. Teaching our children the skills to save a life.

At Fast First Aid Training our motto is education!!! Our program is all about creating awareness around the signs and symptoms of asthma and anaphylaxis and what to do in an emergency.

We have developed a fun and engaging program that will give children the knowledge and skills needed to assist in a situation, if it arises.

There has been an increase of allergies within our community - According to Allergies Australia, the number of hospital admissions for allergies including anaphylaxis has doubled in recent years.

So why not educate our younger generation, how it may affect them and what they can do if they witness a friend having an asthma attack or anaphylactic reaction.

A fantastic hands on 30-40 minute program educating students about asthma, anaphylaxis and CPR. Students will experience administering a training epi pen and doing CPR on a manikin.

A fun, informative and interactive session.

Program inclusions
